**HVAC w/EPA Certification**

Instructor - Buzz VonTessmer

This two-day class will consist of basic operation and theory of HVAC equipment, identifying problems in the HVAC equipment such as low charge, overcharge, components that need service, diagnosis of problems. Prep for HVAC 608/609 federal refrigerant handler's license. Extra time spent on proper operation of gas furnace and diagnosis and repair of problems. **There will be an additional fee of \$99.00 to take the exam, with the check made payable to BVT Technical Center, Inc.**

**Pest Control w/Certification**

Instructor – Christensen's Urban Insect Solutions, Inc.

This two-day class will provide the training and certification your staff need to conduct pest and herbicide activities your properties. Dr. Christensen is a nationally recognized leader in the industry and will prepare your staff for the state exams given on-site during the session. There will be an additional fee of \$25.00 and \$10.00 to take the state certification test with the checks made payable to KY State Treasurer.

**Water Heater Repair**

Instructor - HD Supply

This half day class is an introduction and overview of operation, maintenance and repairs of typical residential grade water heater tank. The course will present and clarify operation fundamental of the natural gas burner and in-tank electrode water heaters, as well as typical equipment parts, layout and design. The course will identify major serviceable components and maintenance procedures used at set-up, operate, troubleshoot, repair and clean a typical residential grade water heater.

**Kitchen Appliance Repair**

Instructor - HD Supply

This course will identify the top five issues with each appliance and how to solve them. This course will also review the mechanical and electrical components, operations, cycles, functions, and general troubleshooting of each of the listed appliances. Typical design and installation principles, and a review of how to read wiring diagrams will be a focus of this class.

**REAC/ Inspire**

Instructor - U.S. Inspection Group

In this One-day class instructors will educate you on every aspect of the NSPIRE including a year's worth of "tricks" and helpful tips on preparing for the REAC inspection.

**Plumbing Fundamentals**

Instructor - HD Supply

This 3-hour course addresses the challenges associated with the most commonservice requests on site; plumbing. Topics will include major fixture components from the water meter and pressure regulator thru the hot and cold-water supply lines into the building. The supply lines include Copper, PVC, CPVC, Galvanized, Pex, and the tools used to assemble a watertight circuit are presented. Typical basin, bath, and shower fixtures, associated drains, and the tools and techniques for opening them will be covered. Safety with tools, products and process will be an additional focus. (Optional per customer request and time permitting) Water heater troubleshooting, maintenance and repairs.

**Make Ready Maintenance \*\***

Instructor - HD Supply

This 3-hour course is an introduction and overview of a typical make ready found in multi-family housing. This course will be a guide to a typical make ready understanding that every make ready is different and the definition of what a make ready differs from company to company according to policies and procedures. This course will review the guidelines for executing an efficient make ready and acknowledge some of the changes that are occurring in the industry as well. \*\* (Non Hands-On)

**Lead Renovator**

Instructor – Linda Griffen

This Lead Renovator Initial Certification (RRP Training) course includes lead safety training approved by the EPA or applicable EPA-Authorized state program. Any contractor performing qualifying work on pre-1978 homes or child-occupied facilities must employ at least one Certified Renovator who has successfully completed this training. The course concludes with a certification exam.

Already RRP Lead Certified? View the 4-hour refresher course schedule to renew your certification.

**Active Shooter Threat Preparedness**

Instructor – Murray PD

Upon completing this course, the participant will be able to describe actions to take when confronted with an active shooter and responding law enforcement officials. Recognize potential workplace violence indicators. Describe actions to take in order to prevent and prepare for potential active shooter incident and describe how to manage the consequences of an active shooter incident.
